

**Scrum Board:**

MICHELLE = ORANGE

KIRBY = PINK

NICOLE = BLUE

ALEX = RED

RAYMOND = GREEN

| User Story  | To Do   | In Progress   | Done   | No longer needed |
|---|---|---|--|------------------|
| As a user, I want a personal profile page where I can update information about myself, so that other users might get to know me.  | Task 5: Add user's photo next to snippets they have posted. | Task 4: Make username clickable and have it link to their respective profile. | Task 1: Write a new HTML page to represent the user profile<br><br>Task 2: Form a new database for user profiles<br><br>Task 3: Make aspects of this page editable, and save those aspects to the user database, where they can later be accessed. |                  |
| As a user, I want the website to look visually organized and aesthetically pleasant, so that it is simple and easy for me to use. |   | Task 3: Improve CSS for stories on user's profile page.                       | Task 1: Improve index page, make it more welcoming to new users.<br>Task 2: Implement color scheme, add tasteful graphics  |                  |
| As a user, I want to see what snippets I've posted to other stories in the past and maybe check how they're coming along.         |   |   | Task 1: Add field for user stories/contributed stories.<br>Task 2: Display each story title a user has started on their profile page.  |                  |

|  |   |                                |   |  |
|--|---|--------------------------------|---|--|
|  |   |                                | <p>Task 3: Display each story title a user has contributed to underneath.</p> <p>Task 4: Make these linkable to their respective stories.</p> |  |
| As a user, I want to view other stories by post date, popularity, number of snippets, and genre. | <p>Task 1: Add drop down menu for sorting.</p> <p>Task 2: Add functions for filtering for each parameter.</p> <p>Task 3: Allow sorting to be conducted by the menu buttons.</p> |                                |   |  |
| *NOT A STORY*<br>Testing   | Task 3: Refactor  | Task 2: Conduct and pass tests | Task 1: Write testing functions   |  |
